WORK EXPERIENCE

Full-Stack Developer

Oozou

03/2022 - Present

Thailand (REMOTE)

Description

- Tech. stack: NestJS, NextJS, ReactJS, MsSQL

Full-Stack Developer

Teasty Software

02/2019 - 02/2022

Nizhny Novgorod, Russia

Description

- While working in Teasty software I had the chance to work in a small team to build an internal system for the primary client of the company at the time: PizzaRicca, one of the biggest local chains of restaurants, the main objective was to build a software to serve the daily operations of the chain on multiple levels, starting from receiving orders and dynamically assigning them to outlets based on their geographical locations, to generating 15 different reports automatically and everything in between such as management of employees, points-of-sale, stock and many other functionalities
- Tech. stack: React, NodeJS, Redux, Moleculer, MySQL, Firestore, Firebase Authentication

Front-End Developer (Intern)

FireFly

11/2018 - 02/2019

REMOTE

Description

- The company's main product is a recommendation system in the medical research field. My main job was working on the admin dashboard as a front-end developer
- Tech. stack: JavaScript, React, Redux
